

CJ SHEERAN

Job Title: Graduate Mechanical/Manufacturing Engineer

The Business:

CJ SHEERAN is Ireland's largest manufacturer and recycler of timber packaging and pallets, providing a premium quality, sustainable and accredited packaging solution to Ireland and the UK's diverse network of pallet consumers. Headquartered in Mountrath, Co. Laois the business has a number of manufacturing sites across Ireland.

The Role:

We are currently undergoing exceptional growth and now have an opening for a Graduate Mechanical/Manufacturing Engineer to cover the CJ Sheeran Group.

Tasks and Responsibilities:

- Supporting the Engineering Manager with various capital projects across the group
- Assisting with the tendering, procurement, installation and commissioning of large plant for various projects
- Liaising with sub-contractors on project progress and support during the install phases
- Reporting on project progress to the Engineering Manager
- Developing and updating plant asset registers
- Supporting the maintenance department re preventative maintenance schedules and progress against same
- Assisting with the compilation of KPI information on a daily basis re the manufacturing processes within each work area
- KPI reporting on manufacturing stats and performance
- Be safety conscious and support driving our safety culture across every aspect of our business
- Update CAD layouts as new installs are completed

Skills and Experience:

- Level 8 degree in Mechanical/Manufacturing/electrical engineering obtained within the last four years.
- Prior internship or experience in a manufacturing setting preferred.
- Proficient in MS Office and AutoCad
- Excellent analytical and problem-solving skills.

Competitive salary commensurate with experience. An excellent opportunity to join a progressive and dynamic company with opportunities for professional development and growth.

Interested candidates should submit a CV and cover letter detailing their qualifications and relevant experience to hr@cjs.ie
